

JONSERED CS 2159 C

With raw power and a highly competitive power-to-weight ratio, this saw is just as good for felling really big trees as it is for limbing and cross-cutting. This is Jonsered's first saw that has a carburettor with built-in fuel compensation. This means that the fuel-air mixture is kept constant, so that the power remains unchanged over time. Together with turbo air cleaning, this keeps the power high while reducing filter wear, emissions and fuel consumption. The machine also has a magnesium crankcase, side-mounted chain tensioner and a catalytic converter which decreases emissions without affecting power.

ULTICOR

The most advanced machines designed for tough work and best performance.

TURBO

Jonsered's unique turbo intake air cleaning system removes up to 97% of the sawdust from the air before it even reaches the air filter.

SPECIFICATIONS

Cylinder displacement	59 cm ³ / 3.6 cu.inch
Power output	3 kW
Equivalent vibration level (ahv, eq) front / rear handle	3.9/4.4 m/s ²
Sound pressure level at operators ear	102 dB(A)
Sound power level, guaranteed (LWA)	114 dB(A)
Recommended bar length, min-max	33-50 cm / 13"-20"
Weight (excl. cutting equipment)	5.6 kg / 12.3 lbs

ANTI VIB

Our system based on damping elements that provides one of the best vibration damping on the market.

SPIN START

Spin Start reduce the resistance in the starter cord by up to 40%.
